

PREP & COGENT

TWO DAYS WORKSHOP

By

Dr. J.P. DAS

Emeritus Professor and Director,
J.P.Das Developmental Disabilities Centre,
University Alberta, Edmonton, Canada

Dear Friends

DAT is pleased to announce a “Two days workshop on PASS Reading Enhancement Program, Cognitive Enhancement program and Math Module” by Dr. J.P. Das. This is intended for practitioners or those professionals who wish to bring an effective and sustainable change in the life of children with learning difficulties.

This Program is a great opportunity, for all of us as it is being conducted by Dr. J.P. Das himself who is an originator of these programs in the field of disability rehabilitation.

The program is based on the legendary theory of PASS (P**l**anning, A**t**tention, S**u**ccessive and S**i**multaneous Processing) of intelligence modelled after Luria’s work.

We can all upgrade our skills through this program and become better equipped professionals in the treatment of children with learning difficulties.

I, on behalf of Dyslexia Association of Andhra Pradesh (DAT), extend an invitation to you to attend the program and enable better service to children with learning difficulties.

Manisha Gogte
President
Dyslexia Association of Telangna

About DAT

DYSLEXIA ASSOCIATION OF Telengana (DAT) is a non-profit organization working for the rights of children with dyslexia. We are a group of parents, counselors and remedial teachers who have come together to help children, teachers and parents of Telengana & Andhra.

Our Mission

- To spread awareness about Dyslexia
- Training & creating a network of professionals who can help children with dyslexia.
- Forming parent support groups

For more information visit us at www.DAT.in

Date: 9th-10th December 2016

About PREP

(PASS Reading Enhancement Program)...

The PASS Reading Enhancement Program(PREP) improves the information-processing strategies that underlie reading, while avoiding the direct teaching of word-reading skills.

Date: 9th-10th December 2016

Accordingly, the program is structured so that tacitly acquired strategies are likely to be used by the children in appropriate ways.

Attention and planning are important aspects of tasks given in the program.

About COGENT

(Cognitive Enhancement Training)

Cognitive Enhancement Training is designed for the enhancement of cognition, phonological awareness, and language, especially linked to literacy and school learning.

Cognitive Enhancement Training (COGENT) is designed for children ages 4 to 7 with normal and atypical developmental histories Limited exposure to literacy, Mild developmental delay, Language impairment, At risk for developing dyslexia and other learning difficulties. Cognitive Enhancement Training can also be used as a continuing activity at home. It provides an alternative route toward the development of reading and associated academic skills.

About Modules for Math

Modules for Math has shown efficacy in improving core cognitive skills which are important for math proficiency. Designed for children in kindergarten to grade 2, the aim is to further develop and expand children's innate mathematical capacity such as differentiation of size and number, use of working memory, and problem solving. Modules for Math is a hands-on approach to learning the foundations of math integrated with a rational base of mathematics in problem solving and computation.

Benefits of using PREP & COGENT Program

1. You can understand child's cognition in simple terms and also transfer the developed potential in to day to day learning skills.
2. You can develop child's inhibition and self regulation skills.
3. You can develop children's Meta Cognition skills.
4. You can develop child's language abilities.
5. You can develop all pre-requisites of reading skills.
6. You can develop child's language comprehension skills.
7. You can develop inhibition among children with ADHD.
8. You can develop planning skills.

Date: 9th-10th December 2016

9. You can develop sustained attention.
10. You can develop child's simultaneous and successive processing skills.
11. You can get multiple ideas to help the child to learn educational concept and also to generalize them in daily life.
